

# VISITOR'S GUIDE

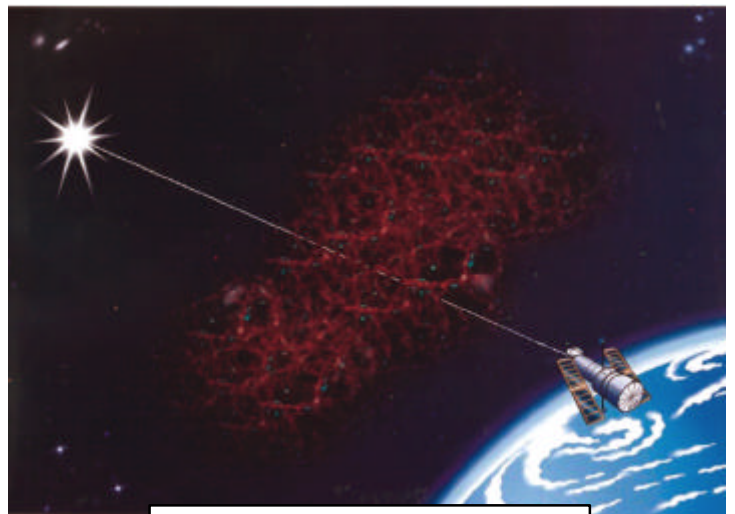

## (Abbreviated Outline)

### (1) THE QUEST FOR MEANING

As you descend into the darkened auditorium of this exhibit, Charles Ives' *Three Questions* is quietly playing in the background. You experience and see the latest awe-inspiring sights of the Universe as viewed through the eyes of the NASA Hubble Telescope. You are brought to a moving encounter with the sound and sight of the Genesis of the Universe. The Bible starts not with an argument, but like the sudden beat of a drum: "*In the beginning, God.*"

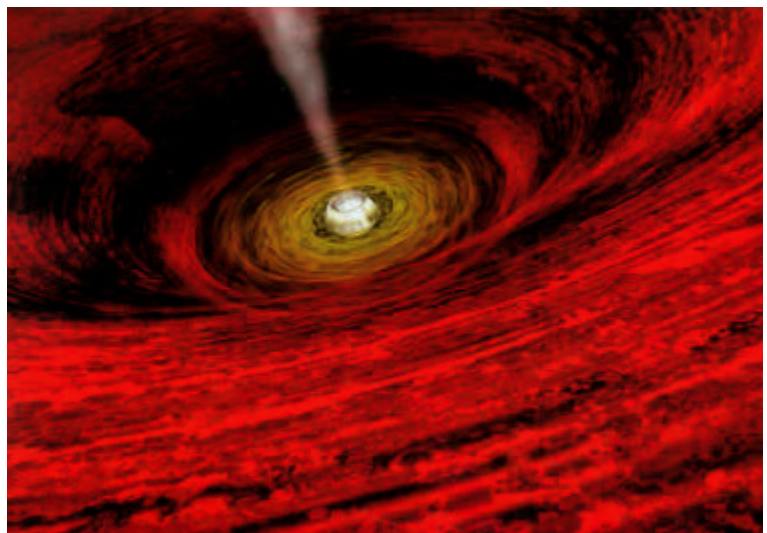

**Space Station**

**Hubble finds Hydrogen**

You are then transported through a fascinating panorama of the Stone Age and are confronted with the scientific fact that, *of the about fifty billion species produced, humanity is a unique creation, the only rational and intelligent creature, which the Bible calls the Image of God.*

**Black Hole**
